

On 3/1/24 the following happened:

1.) The Treatment Team came to meet with me to let me know that per Administration they would be meeting with me every Friday to review the mail restriction I am on.

We will see what happens because I still feel I am on the restriction illegally and under false pretenses. The funny thing is that out of nowhere Administration now wants the Treatment Team to meet with me weekly. Is it because of my Article 78 or Lawyers?

2.) I received two replies from Risk Management that said in part:

a.) "Risk Management has received and reviewed your correspondence dated February 19, 2024 regarding concerns with a loss of privilege. In a review of the LOP documentation, the information which the LOP is based on is accurate and warranting of a loss. As has been previously stated, losses of privilege are based on documented and observed behavior."

b.) "Risk Management has received and reviewed your correspondence dated February 19, 2024 regarding staff. Please be advised, it appears that staff did not act outside of professional boundaries. According to the Resident Handbook page 29. Subsection 17 putting anything in front of windows that would obstruct other's ability to easily look through the window of your dorm room is a violation of the Code of Conduct. It appears that staff redirected accordingly."

3.) I met with Ken Paparella about "a" & "b" above along with the separation that was forced upon me.

Then on 3/4/24 I sent Danielle Tope, Executive Director two Appeals that said in part under "reason for appeal":

a.) "Reply is insufficient as 'Action Requested' was not

answered, SCTA staff member lied in note and is currently being spoken to by STARC Admin, about what she did. The LOP should have never been issued before vid/audio was reviewed.

b.) "Reply is insufficient as "Action Requested" was not answered. My window was NOT blocked as supervisory staff will confirm, SCTA targeted me as other residents windows WERE blocked. There is no Resident Handbook for STARC-Dakview."

The cover ups/lies continue. The residents are always in the wrong even when review of audio and video will confirm the resident is in the right and staff were in the wrong/abusive. Maybe things will start to change once this place realises the I WONT STOP!!
