"FLORIDA CONCEALS ITS METHOD OF MURDER"

Florida's Constitution has a provision that allows the public to examine and inspect anything dealing with official public business. Most people may not be aware that Florida is going to pass Senate Bill 1204 which will allow Florida to more secretly murder its citizens under the mantle of Justice. And we don't see a problem with this? Come on!! What's going on with a society who wants to hide the manner and method for which it kills a man or woman?! To me this shows that the state has something to hide. They want to take a fairly healthy human being, (although no doubt mentally messed up from years of solitary confinement with this death sentence hanging over their head) march them into the death chamber with as much secrecy as possible, and MURDER THEM!! Because whether its legal or not, on that death certificate it list cause of death " HOMICIDE " therefore it is a murder. So here our state legislature's want to conceal this homicidal drug, that their murdering people with from the state tax payers. Its already bad enough that they make the executioner exempt from public records, now they want to make exempt the drug manufacturer or some backwoods source for which they get the drugs to murder a citizen. And we don't see anything wrong with this? So here we have some serial killer, cause let's face it anyone that wants a job murdering people..... is one sick twisted son of a bitch!!!!" And to do it over and over age. Well whether you make it legal through some cheap Bill's that you pass into law doesn't make this anymore morally right than some mentally ill serial killer on the street! It still makes you mentally messed up as a human being! Because no one in their right mind is going to take this job, where you are taking human life!!! So yes its bad enough that the state allows these state paid serial killer's to hide their identity from the public, but now they've taken these these cheap flimsy immoral Bill's such as SB 1204 to another level of secrecy. My God what is wrong with these people?! And these are the same legislature's who stand there claiming to be PRO LIFE. Yes I just don't get it. And I guess I never will. Just wanted to let you know about another cheap Bill that Florida will be turning into a law to further conceal their sick and twisted desire to murder under the mantle of Justice. God have Mercy!

Regretfully submitted Ronald W. Clark Jr. #812974
